Getting Started

1.1 Accessing the System

Open your web browser and navigate to the system URL provided by your administrator. The EITech System login page will appear with the organisation's name at the top.

1.2 Logging In

1

Enter your **Email Address**

2

Enter your **Password**

3

Tick **Remember Me** only if you are on a private computer

4

Click **Sign In**

If correct, the system redirects you to your assigned portal based on your role.

Note: If you see "Your account has been deactivated", contact your system administrator.

1.3 Logging Out

Click **Sign Out** in the top-right corner. Always log out when leaving your workstation, especially on shared computers.

1.4 Navigation

The **sidebar** on the left organises all modules. Click any item to open it. On mobile devices, tap the menu icon (≡) in the top bar to reveal the sidebar.

Dashboard

The Dashboard is the first screen after login. It shows a live financial summary of the organisation.

CARD	WHAT IT SHOWS
Total Loans Disbursed	Cumulative principal disbursed to all clients
Total Savings	Sum of all savings account balances
Active Members	Number of clients with active accounts
Fixed Deposits	Total principal held in active fixed deposits

Below the cards you will find **quick-access links** to common actions and a **recent activity feed** showing the latest transactions.

Clients

Clients are the people and groups your organisation serves. Every loan, savings account, or fixed deposit must belong to a client.

3.1 Viewing All Clients

Go to **Clients** in the sidebar. The table shows Client Number, Name, Type (Individual / Group), Phone, Email, and Status. Use the **search bar** to find a client by name, phone, or number. Use the **Status filter** to show Active, Inactive, or Blacklisted clients.

3.2 Registering an Individual Client

1

Click **New Client** → select **Individual Member**

2

Complete the 5-step wizard (use Next / Previous to move between steps)

3

Click **Submit** on Step 5 to save

STEP	FIELDS
1 — Personal Info	First Name, Middle Name, Last Name, Gender, Date of Birth, Marital Status, Nationality, National ID / Passport No., Profile Photo
2 — Contact	Primary Phone, Alternative Phone, Email, District, Village/Parish, Physical Address
3 — Employment	Employment Status, Purpose of Joining, Expected Monthly Savings, Interested in Loans?
4 — Next of Kin	Full Name, Relationship, Phone, Address
5 — Preferences	Branch, Account Status (default: Active), Date Joined, Preferred Communication

3.3 Registering a Group Client

1

Click **New Client** → select **Group**

2

Choose the **Group Type**: Savings Group or Pooled Group

3

Fill in Group Name, Phone, Email, Branch, Status, Joining Date, Membership Fee

4

For **Savings Groups**: enter the Monthly Interest Rate (%)

5

For **Pooled Groups**: enter Expected Contribution and Contribution Cycle (Weekly / Monthly / Quarterly)

6

Click **Save Group**

3.4 Viewing a Client Profile

Click the **eye icon** next to any client. The profile shows personal details, linked loans, savings accounts, fixed deposits, membership fee status, and member shares.

3.5 Editing a Client

Click the **pencil icon** on the list or the **Edit** button on the profile. Update the required fields and save.

3.6 Sending a Portal Invitation

Clients can log into their own online portal to view accounts. To invite a client:

1

Open the client profile

2

Click the **envelope icon** (or Invite to Portal)

3

Confirm the prompt — the system emails a login link to the client

Note: The client receives an email to set their password and access the Client Portal.

3.7 Membership Fees

If your organisation charges a membership fee, open the client profile, scroll to **Membership Fee**, and click **Record Payment**. Choose the payment source (cash GL account or savings account), enter the amount, date, and receipt number, then save. The system tracks required, paid, and outstanding amounts.

Chart of Accounts

The Chart of Accounts lists all General Ledger (GL) accounts used in double-entry bookkeeping. It is pre-seeded with 45+ accounts covering Assets, Liabilities, Equity, Income, and Expenses.

4.1 Viewing Accounts

Go to **Chart of Accounts**. Accounts are listed by code and type with their current balance.

4.2 Adding a New Account

1

Click **New Account**

2

Enter the Account Code (unique), Account Name, Type, and Description

3

Click **Save**

Important: Only add accounts you genuinely need. Do not duplicate existing accounts. Consult your accountant if unsure.

4.3 Editing an Account

Click **Edit** next to any account. You can update the name and description, but not the account code once it has been used in transactions.

Journal Entries (Manual Transactions)

Manual journal entries let you post any financial transaction directly into the General Ledger using double-entry principles.

When to use this: Corrections, adjustments, membership fee income, inter-account transfers, and any transaction not covered by a dedicated module.

5.1 Posting a Journal Entry

1

Go to **Journal Entries → New Entry**

2

Fill in: **Date** (cannot be future), **Description**, and **Receipt / Reference**

3

Add journal lines (minimum 2): for each line, select an Account, optionally tag a Client, add a description, and enter a Debit or Credit amount

4

Watch the **Totals bar** — a green "Balanced" indicator must appear before you can submit

5

Click **Post Transaction**

Client tagging: If you tag a client on a savings or loan account line, the system automatically updates that client's individual account balance. Always tag the client when the line affects an individual member.

5.2 Reversing a Journal Entry

Open the journal entry, click **Reverse**. The system posts an equal and opposite entry and marks the original as reversed. This is the correct way to fix a posted entry.

5.3 Deleting a Journal Entry

Only the **Super Admin** can permanently delete a journal entry. Open the entry and click **Delete**. This is irreversible — use reversal instead wherever possible.

Loans

6.1 Loan Products

Before creating loans, the organisation must have loan products configured. Go to **Loan Products** to see available products. Each product defines the default interest rate, interest method, and term.

6.2 Creating a Loan Application

Go to **Loans** → **New Loan** and complete the 3-step wizard:

STEP	FIELDS
1 — Client & Product	Client (searchable), Loan Product, Principal Amount, Application Notes (optional)
2 — Loan Terms	Interest Rate (%), Interest Method (Flat / Reducing Balance), Term in Months — leave blank to use product defaults
3 — Guarantors	Optional. Click Add Guarantor for each: Full Name, Phone, ID, Relationship, Employer, Monthly Income, Address

Click **Submit Application** on Step 3. The loan is created with **Pending** status.

6.3 Disbursing a Loan

A loan must be disbursed before repayments can be recorded.

1

Open the loan detail page → click **Disburse Loan**

2

Review the **Fees & Deductions** table (Application Fee, Management Fee, Insurance Fee)

3

For each fee, choose whether to deduct from the **loan amount** or from the client's **savings account**

4

Review the **Fee Summary** showing the net cash the client will receive

5

Set the **Disbursement Date**

6

If any fees are deducted from savings, select the **Savings Account**

7

Click **Disburse**

The loan becomes **Active** and the repayment schedule is generated automatically.

6.4 Recording a Loan Repayment

1

Open the loan → click **Record Repayment** (or use the Repay action from the loans list)

2

Enter Amount, Payment Date, Payment Method, and Receipt / Reference

Click **Save**

Allocation order: Repayments are applied in this order — Penalty first, then Interest, then Principal.

6.5 Loan Statuses

STATUS	MEANING
Pending	Application submitted, not yet disbursed
Active	Disbursed and repayment is ongoing
Closed	Fully repaid
Defaulted	Overdue beyond the grace period

6.6 Statements & Exports

From the loan detail page, use the **Export** dropdown to: view the Loan Statement on screen, download the Loan Statement as PDF, or download the Repayment Schedule as PDF.

Savings Accounts

7.1 Savings Products

Products define the interest rate, minimum balance, and GL accounts. Go to **Savings Products** to see what is configured.

7.2 Opening a Savings Account

1

Go to **Savings** → **Open Account**

2

Select the **Client** and **Savings Product**

3

Set the **Opening Date** → click **Open Account**

7.3 Depositing into a Savings Account

Open the savings account → click **Deposit**. Enter Amount, Date, Payment Source (cash GL account), Receipt / Reference, and Narration. Click **Post Deposit**. Alternatively, use **Quick Teller** for faster processing.

7.4 Withdrawing from a Savings Account

Open the account → click **Withdraw**. Enter Amount, Date, Fee (if any), Payment Source, Reference, and Narration. Click **Post Withdrawal**.

Note: Withdrawals that would take the balance below the product's minimum balance will be blocked.

7.5 Transferring Between Accounts

Open the source account → click **Transfer**. Select the destination account, enter the Amount, Date, and Reference. Click **Post Transfer**.

7.6 Posting Interest

Single account: Open the account → click **Post Interest** → confirm the date → click Post.

All accounts at once (bulk): On the Savings list page, click **Post Interest** (top right) → select the Posting Date → click **Post Interest to All Eligible Accounts**.

Interest is calculated based on daily balance and the product's annual rate.

7.7 Viewing a Statement

Open any savings account and scroll down for the full transaction history. Click **Export Statement (PDF)** to download.

Fixed Deposits

8.1 Fixed Deposit Products

Go to **FD Products** to see available products. Each product defines the default interest rate, term, and GL accounts.

8.2 Creating a Fixed Deposit

1

Go to **Fixed Deposits** → **New Fixed Deposit**

2

Select the **Client** and **FD Product**

3

Enter **Principal Amount**. Override interest rate and term if different from product defaults

4

Set the **Start Date** — a live maturity calculation shows projected interest and maturity amount

5

Select **Funding Source**: Cash (select cash GL account) or Deduct from Savings (select client's savings account)

6

Enter the **Receipt / Reference** → click **Create Fixed Deposit**

Interest formula: Simple Interest = Principal × Rate × (Term ÷ 12)

8.3 Processing Maturity Payout

1

Open the fixed deposit — a maturity banner appears when it has matured

2

Click **Process Maturity Payout**

3

Choose the payout destination (savings account or cash), confirm date and reference

4

Click **Process** — the FD closes and the maturity amount is credited

8.4 Breaking a Fixed Deposit Early

1

Open the fixed deposit → click **Break FD**

2

Read the warning: only the **principal** is returned; all accrued interest is **forfeited**

3

Choose the payout destination, confirm date and reference → click **Break Deposit**

This action cannot be undone. Confirm with the client before proceeding.

8.5 FD Certificate

Open any fixed deposit → click **FD Certificate** to download a PDF certificate to give to the client.

Groups

Groups are clients that operate collectively. Two types are supported:

- **Savings Group** — each member has an individual balance and earns interest
- **Pooled Group** — all members contribute to a shared fund

9.1 Viewing Groups

Go to **Groups** in the sidebar. The list shows group name, number, member count, total balance, interest rate, and status.

9.2 Creating a Group

Groups are created through the **Clients** module (Section 3.3). Once created, the group appears in both the Clients list and the Groups list.

9.3 Managing Group Members

1

Open the group → scroll to **Members** → click **Add Member**

2

Enter Full Name, Phone, National ID. Tick **Is Leader** if applicable

3

Enter a **Portal Email** if the member will use the Group Portal (default password: **Welcome@123**)

4

Click **Save**

To edit a member, click the **edit icon** on their row. You can update details, change their password, or promote/demote them as leader.

9.4 Recording Transactions — Savings Group

From the group detail page use: **Deposit** (record a deposit for a member), **Withdraw** (record a withdrawal), or **Post Interest** (calculate and post monthly interest to all members).

9.5 Recording Transactions — Pooled Group

Use: **Record Contribution** (mark a member's contribution for the cycle) or **Pool Withdrawal** (record a withdrawal from the shared pool).

9.6 Transferring a Member Balance to Savings

Click the **Transfer to Savings** icon next to the member. Select the target savings account, enter the amount and date, then click **Transfer**.

9.7 Sending a Portal Reset Link

If a group member forgets their password, click the **Send Reset Link** button (envelope icon) next to their name. The system emails a reset link to their portal email address.

Member Shares

This module tracks member share subscriptions — how many shares each member holds and how much has been paid.

10.1 Viewing All Shares

Go to **Shares** in the sidebar for a summary of all members' share positions.

10.2 Adding Shares to a Member

1

Open the **Client Profile** → scroll to **Member Shares**

2

Click **Add Share** → enter Share Value and Notes → click **Save**

The share is created with **Unpaid** status.

10.3 Recording a Share Payment

Click **Pay** next to the share. Choose the payment source (cash GL account or deduct from savings), enter the Amount (partial payments allowed), Date, and Receipt. Click **Save**.

10.4 Revaluing Shares

Click **Revalue** next to the share. Enter the New Share Value and Effective Date. Click **Save**. To revalue all shares at once, use **Shares** → **Revalue All**.

10.5 Liquidating Shares

When a member exits and their shares are bought back, click **Liquidate**, choose the payout method (Cash or Credit to Savings), enter the date and notes, then click **Liquidate**.

This action cannot be undone. The share is permanently marked as Liquidated.

Payroll

11.1 Creating a Payroll Run

1

Go to **Payroll** → **New Payroll Run**

2

Select **Month** and **Year**, add a Description (optional)

3

Click **Add All Active** to load all active employees, or add rows one at a time

4

For each employee: confirm Basic Salary (auto-fills), adjust Allowances and Deductions — Net Salary calculates automatically

5

Click **Save Payroll Run** (saves as Draft)

Net Salary = Basic Salary + Allowances – Deductions

11.2 Processing a Payroll Run

1

Open a Draft payroll run

2

Review all employee figures carefully

3

Click **Process Payroll**

The system posts all salary GL entries and credits each employee's linked savings account. The run is locked after processing — status changes to **Processed**.

11.3 Reversing a Payroll Run

If a payroll was processed in error, open the run and click **Reverse**. All GL entries and savings credits are reversed and the run returns to **Draft** for correction.

Reports

Go to **Reports** in the sidebar and click any report card to open it.

REPORT	WHAT IT SHOWS	KEY FILTERS
Trial Balance	Debit and credit totals for every GL account	As-of date
Income Statement	Revenue vs expenses — profit or loss for a period	Date range
Balance Sheet	Assets, Liabilities, and Equity snapshot	As-of date
General Ledger	Every transaction posted to a specific account	Account, date range
Loan Portfolio	All loans with status and outstanding principal	Status, date range
Loan Aging	Overdue loans grouped by how long they are overdue	Date
Repayment Schedule	Full repayment schedule for a selected loan	Loan selection
Interest Income	Interest earned on loans and savings in a period	Date range
Savings Balances	All active savings accounts and their balances	As-of date
FD Maturity	Fixed deposits maturing within a given period	Date range
Member Summary	Per-member summary of savings, loans, FDs, and shares	—

Most reports can be printed or exported to PDF using the **Download PDF** button or your browser's print function (Ctrl+P).

User Management

Only users with the **Manage Users** permission can access this module.

13.1 Creating a New User

Go to **Users** → click **New User**

Enter Name, Email, Phone (optional), Role, Branch, and a temporary Password

Click **Save**, then share the email and temporary password with the user

13.2 Editing a User

Click **Edit** next to any user to change their name, phone, role, or branch.

13.3 Activating / Deactivating a User

Click the **toggle icon** (play/pause) next to a user. A deactivated user cannot log in. Use this instead of deleting accounts when staff leave.

System Settings

Only users with the **Manage Settings** permission can access this. Go to **Settings** in the sidebar.

Key Settings

GROUP	KEY SETTINGS
Organisation	Organisation Name (shown on reports and login page), Logo (PNG/JPG/SVG, max 2 MB), Address, Phone, Email
Financial	Default currency symbol, financial year start month, default penalty rates
Modules	Enable/disable: Membership Fees, Shares, Fixed Deposits, Groups, Payroll
Email/Mail	SMTP settings for sending portal invitations and password resets

After making changes, click **Save Settings** at the top of the page.

Data Reconciliation

If account balances appear out of sync, use **Run Reconciliation** at the bottom of Settings. This recalculates all balances and fixes any discrepancies.

Only run reconciliation when advised by your system administrator.

Audit Log

Go to **Audit Log** in the sidebar. Every significant action in the system is recorded here: who did it, what they did, and when. Use the date filter and search to find specific events. This log cannot be edited or deleted.

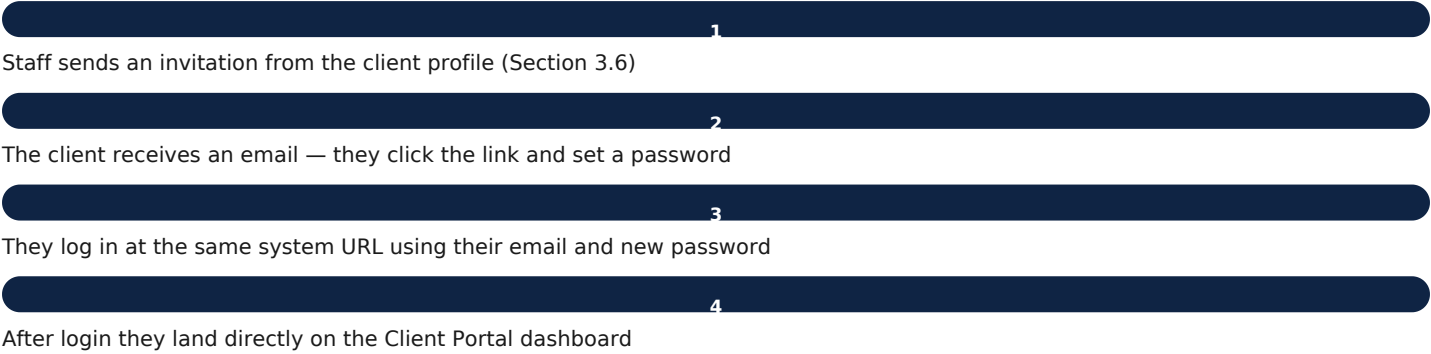

Client Portal

The Client Portal is a separate login area where individual clients can view their own accounts without accessing any administrative features.

16.1 What Clients Can See

PAGE	CONTENT
Dashboard	Summary of all savings balances, active loans, and fixed deposits
Accounts	List of all linked savings accounts, loans, and FDs
Activity	Chronological feed of all recent transactions
Savings Statements	Full statement per savings account, downloadable as PDF
Loan Statements	Loan details, repayment history, and schedule PDF
FD Statements	Fixed deposit details and certificate PDF

16.2 How a Client Accesses the Portal

16.3 Multiple Accounts

If a client is linked to more than one profile, a **Switch Account** option appears allowing them to toggle between profiles.

Group Portal

The Group Portal has two access levels: **Group Leader** and **Group Member**.

17.1 Group Leader Portal

Group leaders have a management dashboard showing the health of their group.

SECTION	WHAT IT SHOWS
Summary Cards	Pool/Total Balance, Active Members, Deposits This Month, Last Deposit Date
Trend Chart	Bar chart of monthly deposits for the last 6 months
Top Savers	Top 3 members ranked by savings balance
Lowest Balances	Bottom 3 members (flagged in red if zero balance)
Watch List	Members with zero balance or no deposit in 60+ days
All Members	Full member list with balances and last deposit dates
Member Statements	Full transaction history for any member in the group

17.2 Group Member Portal

Members see only their own position within the group:

- Their individual savings balance
- Group name and monthly interest rate
- Full transaction history (deposits, withdrawals, interest)

17.3 How Group Members Access the Portal

1

When adding a member (Section 10.3), staff enters their **Portal Email**

2

The member's default password is: **Welcome@123**

3

The member logs in at the system URL and should change their password immediately

To reset a forgotten password, staff clicks **Send Reset Link** on the group members table (Section 10.7).

Roles & Permissions Reference

System Roles

ROLE	ACCESS LEVEL
Super Admin	Full access to everything — delete transactions, manage roles, change system settings
Admin	Full operational access; cannot delete journal entries or manage system roles
Cashier	Process deposits, withdrawals, repayments, and Quick Teller; cannot access reports, settings, or user management
Staff	Read-only access to most modules; cannot post transactions
Client	Client Portal only — can view their own accounts
Group Leader	Group Leader Portal — group dashboard and all member statements
Group Member	Group Member Portal — own balance and statement only

Key Permissions

PERMISSION	WHAT IT ALLOWS
view clients	See the clients list and profiles
edit clients	Edit client details and send portal invitations
create loans	Submit loan applications and add guarantors
disburse loans	Disburse approved loan applications
repay loans	Record loan repayments
create savings	Open new savings accounts
deposit savings	Post deposits and bulk interest
withdraw savings	Post withdrawals
create fixed-deposits	Create new fixed deposits
mature fixed-deposits	Process maturity payouts and early breaks
create transactions	Post manual journal entries
reverse transactions	Reverse posted journal entries
view reports	Access the reports module
manage users	Create and edit system users
manage settings	Access and change system settings

PERMISSION	WHAT IT ALLOWS
manage backup	Create and download database backups

Common Workflows

Onboarding a New Member (Full Workflow)

#	STEP	WHERE
1	Register the client	Clients → New Client
2	Collect membership fee	Client Profile → Membership Fee → Record Payment
3	Open a savings account	Savings → Open Account
4	Make the opening deposit	Savings Account → Deposit (or Quick Teller)
5	Create loan application (if applicable)	Loans → New Loan
6	Disburse the loan	Loan Detail → Disburse Loan
7	Invite client to portal	Client Profile → envelope icon

Monthly End-of-Month Routine

#	TASK	WHERE
1	Post savings interest (bulk)	Savings → Post Interest
2	Review overdue loans	Reports → Loan Aging
3	Process group interest (if applicable)	Groups → group detail → Post Interest
4	Run payroll (if applicable)	Payroll → New Payroll Run → Process
5	Generate financial reports	Reports → Income Statement & Balance Sheet
6	Close the financial period	Settings → Financial Periods → Close Month

Correcting a Posted Transaction

SCENARIO	CORRECT ACTION
Wrong amount or account in a manual journal	Journal Entries → open entry → Reverse, then post a new correct entry
Savings deposit or withdrawal posted in error	Open the savings account → find the transaction → Reverse
Loan repayment posted in error	Open the loan → find the repayment → Reverse
Complete removal of an entry (last resort)	Super Admin only — open the entry → Delete

Glossary

TERM	MEANING
GL	General Ledger — the master record of all financial transactions in the system
Double-entry	Every financial transaction has equal debits and credits; the books must always balance
Principal	The original loan or deposit amount, excluding interest
Outstanding Principal	The remaining loan balance that has not yet been repaid
Flat Interest	Interest calculated on the full original principal for the entire loan term
Reducing Balance	Interest calculated on the remaining outstanding principal each period — decreases as the loan is repaid
Amortisation	The process of gradually paying off a loan through scheduled equal payments
FD	Fixed Deposit — a savings product where money is locked for a fixed term at a fixed interest rate
Accrued Interest	Interest that has been earned or incurred but not yet collected or paid
Sub-ledger	Individual member account records that detail the transactions behind the GL balance
SACCO	Savings and Credit Cooperative Organisation
MFI	Micro Finance Institution
Disbursement	The act of paying out an approved loan to the borrower
Collateral	An asset pledged as security against a loan
Guarantor	A person who agrees to repay a loan if the borrower defaults
Maturity Date	The date when a fixed deposit or loan term comes to an end
Reconciliation	The process of verifying that account balances in the GL match the individual sub-ledger records
